Assignment 2

General Instructions:

---

1. **You have to do this assignment individually.**
2. **The assignment must be submitted on LMS.**
3. **There will be a 1 mark penalty for late submission(s).**
4. **Students are expected to follow the honor code of the class.**

Ques 1: Write the steps to find the principal component(s) in PCA.

Ques 2: Define eigenvalues and eigen vectors in PCA.

Ques 3. Why do we choose the covariance matrix in PCA?

Ques 4. Write the steps for the K-means clustering algorithm when k=2.

Ques 5. Write the steps for K-medoids algorithm.
