AYAN PANDEY

Co-Founder & Tech Head, Milo · Software Engineer · ML Researcher
+91-9889623045 · ayan.pande2004@gmail.com · Lucknow, UP, India

EDUCATION

B.Tech Computer Science & Engineering *2024 – 2028*
University of Petroleum and Energy Studies (UPES) · Dehradun

- Relevant coursework: Statistics, Python, Java, Machine Learning, Data Visualisation, Business Intelligence, R for Data Analysis, NLP
- Selected as Batch Changemaker; member of Open Community (dev team)

Student – Business & Technology *2023 – 2025*
Golden Gate University · San Francisco, CA / Remote

- Studied business and technology with exposure to entrepreneurship, quantitative methods, and global market dynamics

EXPERIENCE

Co-Founder & Tech Head *2024 – Present*
Milo – Events Discovery & Social Platform · Delhi / Remote

- Co-founded and lead all technical development of Milo, a GenZ-focused events discovery platform targeting Indian metro cities; currently in Delhi beta with 200–300 user target via WhatsApp community GTM
- Architected full-stack with Supabase (19 tables, RLS, Edge Functions), React, TypeScript, OlaMaps, and Razorpay; implemented 50/50 escrow payout system with Bronze/Silver/Gold rep-tier payout model
- Secured recognition from IIT Guwahati, IIIT Guwahati, and Titan Capital
- Leading a team of 3 (backend, UI, marketing); managing intern onboarding and sprint execution

Developer *2024 – Present*
Open Community – UPES (Student Open-Source Tech Community) · Dehradun

- Core dev team member of UPES's student-run open-source community; contributing to community-driven tech projects and developer initiatives on campus

Changemaker *2024 – Present*
UPES – Batch Changemaker Programme · Dehradun

- Selected as a Changemaker for the B.Tech CSE 2024 batch; recognised for entrepreneurial impact through Milo and cross-disciplinary technical projects

Research Intern *Jun 2024 – Sep 2024*
Indian Council of Medical Research (ICMR) · India

- Contributed to application development research, form creation, and data analysis across multiple live research projects

Internshala Student Ambassador *Aug 2025 – Oct 2025*
Internshala

- Represented Internshala on campus; drove student engagement and internship awareness campaigns

Field Intern *Aug 2022 – Nov 2022*
Vaishnav Engineers – Kisan Uday Yojana (Ministry of Power, GoI) · Rural India

- Participated in implementation of the Kisan Uday Yojna rural electrification project across rural India

Intern *May 2022 – Aug 2022*
Chung-Fa Restaurant · Lucknow, UP

- Gained hands-on experience in hospitality operations, customer service, and business management in a commercial kitchen environment

PROJECTS & RESEARCH

AI Stock Market Prediction Research · *Python · ML · Gemini API · MLflow · DVC*

- Comparing ChatGPT, Gemini, Copilot, Claude, and DeepSeek as stock market predictors against actual market data; building reproducible MLflow + DVC experiment pipeline
- Reviewing paper: Survey of AI Based Stock Market Prediction – Nitin Naik & Dr. Sapana Rathod
- Developed variables program computing H-L, O-C spreads, moving averages, and standard deviation with CSV export
- Achieved 100% ROI in one year from personal stock market trading using technical analysis

Economic Indicators & Stock Market Analysis · *Python · Technical Analysis · Business Intelligence*

- Analyzed the relationship between macroeconomic indicators and stock market trends using technical analysis frameworks

Global River Systems – Marine & Freshwater Impact · *Data Analysis · ESA Data*

- Data-driven analysis of major river systems' influence on marine ecosystems and freshwater availability using European Space Agency datasets; focused on hydrological patterns and environmental impact

Self-Hosted Cloud Infrastructure · *Oracle Cloud · Nextcloud · WireGuard · Docker*

- Deployed personal Nextcloud instance (100GB volume) on Oracle Cloud free tier using Docker
- Built personal VPN using Oracle Cloud and WireGuard for secure remote access

DIY Flipper Zero & Sub-1GHz Radio · *Hardware · RF · Embedded*

- Building a Flipper Zero clone from scratch; exploring Sub-1GHz radio signal capture and analysis

AI-Powered Flour Mill · *Embedded AI · Hardware · ML*

- Designing an AI-integrated flour mill targeting commercial launch; combines hardware engineering with ML-based process optimization

Freelance Development · *Swift · Python · Figma · Sellix*

- Quiz app for electronic interactive devices (Swift/SwiftUI)
- Rule-based NLP chatbot (Python)
- UI/UX prototype and website for Performance India Consultants (Figma)
- Founded and managed digital products store on Sellix.io; sold banner/ad creatives for online communities

SKILLS

Languages: Python, Java, Swift, R, TypeScript, JavaScript

Frameworks & Tools: React, Supabase, MLflow, DVC, Docker, WireGuard, Figma, Logic Pro

ML / AI: Machine Learning, NLP, Gemini API, LLM benchmarking, Predictive Modelling

Cloud & Infra: Oracle Cloud, Nextcloud, Docker, Razorpay, OlaMaps API

Other: Technical Analysis, Business Intelligence, Research Writing, Ethical Hacking (fundamentals), RF / Sub-1GHz Hardware

ACHIEVEMENTS & ACTIVITIES

- Recognised by Titan Capital, IIT Guwahati, and IIIT Guwahati for Milo (startup ecosystem)
- Local Winner – NASA Space Apps Challenge, Lucknow
- Received letters of appreciation from the Defence Minister of India for academic excellence in Class X and XII
- Trekked to Umling La, Ladakh – world's highest motorable road (19,024 ft)
- Semi-finalist in e-sports competition; active in competitive chess
- Published on Medium: "Problems in Implementation of Project Kisan Uday Yojna – A Case Study"
- Certifications: Intro to Cloud Computing, Learn Swift, Build iOS App with SwiftUI, CLI, Introduction to UI/UX Design
